**BRIDGING THE  
COMMUNICATION  
GAP BETWEEN  
DEAF AND HEARING  
INDIVIDUALS  
ACROSS THE  
EUROPEAN UNION**

EASIER aims to design, develop, and validate a complete multilingual machine translation system that will act as a framework for barrier-free communication among deaf and hearing individuals, as well as provide a platform to support sign language content creation.

- ▶ **Bridging the communication gap** between deaf and hearing individuals.
- ▶ **Equal participation of deaf individuals in** the whole range of **everyday-life activities.**
- ▶ **Incorporation of less-resourced sign languages** into sign language technologies to leverage the sign language content creation industry.

**FOLLOW US, STAY TUNED, AND GET INVOLVED!**

EASIER project has been funded by the EU's Horizon 2020 programme under Grant Agreement no. 101016982.
